

The **red line** is the where the document will be cut.

The **blue line** is a safety line for the cut, which important elements that should not pass.

Envelopes can only bleed off the edge on three(3) sides. The gripper for the press will need at least .625" on either side in order to properly print on the envelope. **The Green Dotted Line** will represent where the gripper will have to grab the envelope.
